NEXOULATE MAZE SOLVER

OBJECTIVES:

GET READY TO NAVIGATE!

Step into the future of robotics at our thrilling Robot Maze Solver event! Participants will have the opportunity to design, build, and program robots capable of navigating complex mazes. The robot must intelligently analyze and select the correct path to successfully reach the goal. Precision, speed, and smart decision-making are key – the first robot to reach the finish line wins!

ELIGIBILITY:

- The competition is open to all students.
- Each team must consist of 2 to 4 members.
- A participant cannot be a part of multiple teams.

Open to all students from any college or institution. Participants can compete individually or as a team, as per event rules. All participants must carry a valid student ID card for verification. Entry will be permitted only after successful registration. Participants are expected to follow all event guidelines and maintain discipline throughout the competition.

NEXOULATE

BOT SPECIFICATIONS:

- The robot may be autonomous or manually controlled.
- Maximum dimensions (including tolerance):
Width: 15cm Length: 15 cm Height: 10 cm
- The path width will be 20 cm, and obstacles will be placed 20 cm apart.
- Wireless robots must be controlled manually via communication methods such as Bluetooth, radio, or Wi-Fi.
- The robot must not be made using LEGO parts or any ready-made assembly kits. It must be electrically powered only. Use of IC engines is strictly prohibited.
- Dimensions will be strictly enforced. Non-compliance will lead to disqualification.
- The potential difference between any two points on the robot must not exceed 12V.
- Participants must carry spare batteries to avoid disqualification due to power failure during a trial.
- If the robot takes a wrong path, a penalty time will be added to the final track completion time.

GAMEPLAY:

- The robot starts at the start line, and timing begins with the signal; the timer stops at the finish line.
- Touching obstacles will result in penalty time added to the total.
- Additional penalties will be given for wrong moves or incorrect paths.
- A 2-minute technical timeout is allowed during the run.
- Only 2 members allowed, no mobile phones; detailed scoring rules will be announced on the event day.
